AV MULTIMEDIA DESIGNERS

Novita has specialized in designing a wide range of information, communications and presentation systems since 1972.

We are an independent consulting and design office only. We do not sell equipment or represent manufacturers or suppliers.

We understand how clients can use technology to inform, persuade and teach. We believe that technology is a means to an end, not an end in itself.

We design systems and equipment with an integrated approach, bringing together a number of disparate technologies into a single system package. We want the attention of the audience to be directed towards the content of the presentation, not the technology.

Novita's staff have a wide range of qualifications and experience in Audio-Visual Multimedia design. In addition to formal and in-service training, many have worked in other aspects of the industry such as installation, operation, and technical support.

Our AV Multimedia Services Include:

- Broadcast Systems
- Audio Reinforcement and Effects
- Specialized Lighting and Effects
- Audio Paging and Monitoring
- Video Monitoring
- Large Format Video Display
- Optical Film Projection
- Assistive Listening and Simultaneous Translation Systems
- Teleconferencing and Video Conferencing
- Combined Room Controls
- Control Rooms
- Digital Signage

OPP HEADQUARTERS COMMAND CENTRE

Location: Orillia, Ontario

Project Owner: Ontario Provincial Police

Date Completed: 2010

AV Systems Cost: \$700,000

AV Consultants: Novita

This project involved the renovation to the existing Emergency Operations Centre (EOC), located within General Headquarters in Orillia. Novita designed AV Presentations systems for the Main Operations Room/Command Centre, the Videoconference Boardroom, and the Executive Command Boardroom.

All technology needed to be durable, reliable, user-friendly, and integrate with existing OPP networks, computers, and telephone systems. Existing AV systems were evaluated and integrated where feasible.

Systems included audio and video conferencing, wireless microphones, digital audio signal processing, combined media control, and combined room control.

A video wall was designed using six 67" video cubes to form a 2 X 3 unit wall. The cubes have no bezel, allowing a large, seamless image to be formed using multiple units. A multi-image processor was implemented to allow the resizing and locating of images anywhere on the display screen.

Audio and video matrixing was implemented to allow Emergency Team members to select any video image and associated audio feed on the wall and bring it up on their local monitor and headphones. Smart boards were also included in the design to allow annotation over maps such as Google Earth while tracking the course of an emergency event.

For security, a hard wired system was designed in order to protect information from RF scanner technologies.

EMERGENCY MANAGEMENT ONTARIO

Location: Toronto, Ontario

Project Owner: Government of Ontario

Date Completed: 2006

AV Systems Cost: \$350,000

Interior Designer: LBA Design Group

AV Consultants: Novita

Due to the confidential nature of the facility, photos are not permitted

This project involved the expansion of Emergency Management Ontario's command centre to double the capacity. The centre's primary function is to accommodate representatives from various Ministries, including National, Provincial, and Municipal Emergency Services, during emergencies to co-ordinate efforts.

Security of the persons using the centre, and protecting the confidentiality of the information, were of utmost importance. All equipment systems had to be fully redundant.

Systems included audioconferencing and quad splitting on 4 front video projection systems for a total of 16 images.

Existing problems that Novita's system design overcame included microphone feedback, electromagnetic interference, poor screen viewing angles due to the layout of the room, dim projected images, the use of multiple remote controls for the systems, and equipment controls that required adjustment by an outside company.

Novita's solution was very cost-effective, re-using as much of the existing equipment as possible.

CLIENT LIST

Conference and Convention Facilities

Casino Rama, Rama
St. Clair Centre for the Arts, Windsor
Design Exchange, Toronto
Hummingbird (now Sony) Centre, Toronto
London Convention Centre, London Ontario
Metro Toronto Convention Centre
Niagara Convention and Civic Centre, Niagara Falls
